AngularJS
jQuery
Handlebars
JavaScript
NGINX
Apache
Vagrant

Varnish
CentOs
Bash
ExpressionEngine
CraftCMS
GitHub
New Relic
Yeoman

Selenium
PHPUnit
Yii
CodeIgniter
RESTful APIs
Google Maps API
HTML5 APIs

*** It is just selected skills, tools & experience. Full list will be too big.*

Selected Projects:

IMAGINE

"Imagine" is the all-style music competition for young artists that represents a different approach to the typical "music competition". My responsibilities within the framework of the project include remapping and transforming data from the old structure to a new one; setting-up the server; custom EE add-ons; custom JS coding; simplifying the process of adding language translations; troubleshooting.

STATUSBOARD.co

The web application originally developed for the Dupont company and enabling to use the TV panel as a status board. The back end has been developed with Node.js; front end — with HTML5/CSS3/AngularJS /REST. All slides can be created in the PowerPoint-link editor, including the multilanguage support. Was developed stand alone application for Samsung SmartTV but it can be easily integrated into any other system.

USICH (United States Interagency Council on Homelessness)

Custom google maps solution for EE to display agency data. Troubleshooting.

Education:

Baikal State Economic and Justice University

Bachelor of Science (BS), Computer Science in Economics
2007

Certification:

Six Sigma Green Belt

2012
